

ICR Workspace Working Group Teleconference Meeting Minutes

Date, Time & Location:	August 11, 2004, 2:00pm – 3:00pm EDT		
Attendees:	First Name	Last Name	Institution
	Esther	Asaki	NCI
	Gary	Bader	Sloan
	Craig	Beam	Moffitt
	Terry	Braun	U of Iowa Holden
	Thomas	Casavant	U of Iowa Holden
	Leslie	Derr	NCI
	Terry	Disz	U of Chicago/Argonne
	Steve	Enkemann	Moffitt
	Steven	Eschrich	Moffitt
	David	Fenstermacher	Penn
	John	Greally	Albert Einstein College of Medicine
	Lynette	Grouse	NCI
	David	Jewell	Dartmouth
	David	Kane	NCI/SRA
	Juli	Klemm	Booz Allen Hamilton/3 rd Millennium
	Alex	Lash	Sloan
	Ted	Liefeld	Broad/MIT
	Simon	Lin	Duke
	James	Lyons-Weiler	Pittsburgh
	Steve	Marron	UNC Lineberger
	Shannon	McWeeney	Oregon Health
	Arnie	Miles	Georgetown
	Tom	Moloshok	Fox Chase
	Rakesh	Nagarajan	Wash U
	Michael	Nebozhyn	Wistar
	Michael	Ochs	Fox Chase
	Harold	Riethman	Wistar
	John	Rux	Wistar
	Carl	Schaefer	NCI
	Jennifer	Shoemaker	Duke
	Paul	Spellman	LBL
	Philip	Stafford	TGEN
	Craig	Street	Penn
	Darin	Taverna	TGEN
	Naveen	Vinukonda	Institute For Cancer Prevention
	Kristina	Vuori	Burnham
	John	Weinstein	NCI
	Mathieu	Wiepert	Mayo Clinic
	Cathy	Wu	Georgetown
	Quing	Xaio	JPL
	Liming	Yang	NCI

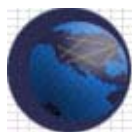

Integrative Cancer Research Workspace

	Yajun Claire Julie	Yi Zhu Zhu	Vanderbilt Booz Allen Hamilton Northwestern University
Introduction	<u>Roll-call, open meeting, review meeting goals</u> <ul style="list-style-type: none"> - Summary of Special Interest Group activities - Update from other Workspaces - ICR face-to-face meeting - General Q & A 		
Review of Workspace Activities	<u>Summary of Special Interest Group activities</u> <ul style="list-style-type: none"> - <u>Translational Tools</u> <ul style="list-style-type: none"> o Terry Braun of Iowa Holden gave a Web demo of TrAPSS. The Institute for Cancer Prevention and possibly Wistar will be adopters for this program. o Rembrant will be presented at the next SIG meeting. This meeting will need to be rescheduled due to the Labor Day holiday. - <u>Pathways</u> <ul style="list-style-type: none"> o Ajay Jain of UCSF gave a presentation of QPACA. Adopter for this application will be Oregon Health. o Carl Schaefer gave a presentation of NCICB's progress on pathways data representation. - <u>Microarray Repositories</u> <ul style="list-style-type: none"> o Mervi Heiskanen (NCI) gave an overview of caArray data exchange. There are a number of projects within ICR that are targeting data exchange with caArray o caArray user acceptance testing will be occurring at the end of this month. Will be released September 16. - <u>Genome Annotation</u> <ul style="list-style-type: none"> o Rakesh Nagarajan (Wash U) gave a presentation of FunctionExpress. o David Kane and John Weinstein (NCI) gave a presentation of GOMiner. o Wistar is the adopter for both of these projects and in general they provide complementary approaches to the annotation of microarray results. - <u>Data Analysis and Statistical Methods</u> <ul style="list-style-type: none"> o Steve Marron (UNC) gave a presentation of DWD. o Joseph Wang (Georgetown) gave a presentation of VISDA. o Wistar is also the adopter on both of these programs, which are both applications for the statistical analysis of microarray data - <u>Informatics for Proteomics</u> <ul style="list-style-type: none"> o David Jewell (Dartmouth) gave a presentation of Q5. The Institute for Cancer Prevention and possibly Oregon Health will adopt this application. 		

Integrative Cancer Research Workspace

	<ul style="list-style-type: none">David is also in contact with EDNR in attempt to identify proteomics data sets that can be used for development within this SIG.
Updates from other Workspaces:	<p>Architecture (Presented by Simon Lin, Duke)</p> <ol style="list-style-type: none">Meeting at Ohio State<ol style="list-style-type: none">Format was open discussionGoal: To define the guidelines necessary to achieve interoperability for caBIGMajor Grid projects presented:<ol style="list-style-type: none">NCICB's caGRID<ol style="list-style-type: none">Evaluated a collection of grid-enabling technologiesUsed caCORE objects to implement some scientifically interesting use casesOhio's Mobius<ol style="list-style-type: none">Provides middleware services and protocols for<ol style="list-style-type: none">Data and metadata managementSemantic queries across disparate data sourcesTranslation of dataAd hoc creation of data warehousesDecisions that impact Silver Compatibility:<ol style="list-style-type: none">XML is the data exchange format<ol style="list-style-type: none">This should implement an object-oriented information modelThere will be support for binary attachmentsSOAP is the message-exchange protocolXML Schema will define data and message formatsArchitecture will provide more guidance here as neededDecisions that impact Gold Compatibility:<ol style="list-style-type: none">Grid technology: Globus toolkit 3.2Distributed querying: OGSA-DAI 4.0Architecture will continue to investigate:<ol style="list-style-type: none">Common query languageCDE and metadata repositoryMessage brokerWorkflow languages/implementationsSecurityXML compressionReference implementations presented:<ol style="list-style-type: none">Georgetown's PIR as a data serviceDuke's RProteomics as an analysis service <p>Controlled Vocabularies and Common Data Elements (Presented by Juli Klemm)</p> <ul style="list-style-type: none">An External Standards Document is available that catalogs and assesses data standards relevant to clinical and basic science. This document will be reviewed at the face-to-face meeting and will be distributed to ICR Workspace this week.The group is working on governance model for Vocabularies. <p>Tissue Banks and Pathology Tools (Presented by Rakesh Nagarajan, Wash U)</p> <ul style="list-style-type: none">A requirementa survey has been sent to the centers.

Integrative Cancer Research Workspace

- The group is currently collecting and reviewing the surveys, which have shown the range of database types at the various centers
- Face-to-face meeting date was discussed, but no decision yet. Likely to schedule it just before or just after the APIII meeting in October.

Clinical Trials Management (Presented by David Fenstermacher, Penn)

- Face-to-face meeting held on July 19 & 20.
- HIPAA compliance was identified as a key issue. David Fenstermacher is the contact person within caBIG for this issue.
- Discussed definition of caBIG compatibility.
- Additional SIG has been created– C3D SIG to focus on C3D and Oracle Clinical installation

Training (Presented by Naveen Vinkanda, Institute for Cancer Prevention)

- The Developer subcommittee is working with the Architecture Best Practices SIG to put together survey questions for developers
- The Adopter subcommittee is putting together a training strategy document .

Strategic Planning (Presented by Michael Ochs)

- Relatively quiet this summer.

Data Sharing and Intellectual Capital (Presented by Terry Braun, Holden)

- A survey has been prepared to ask centers about issues around the exchange of data, specimens, etc. This would include sharing with corporate collaborators.
- There were many discussions about the survey, whether it is useful or over-burdening. The group decided to go ahead and send it out.

ICR Face-to-Face Meeting

- Nearly complete participants list. 35-40 Center attendees, plus attendees from NCI and BAH
- For those center who have identified attendees, those individuals should have received an email yesterday from Claire Zhu confirming their attendance and outlining how travel arrangements should be made.
- Will start first thing Tuesday morning – registration beginning at 8:00 and the meeting starting at 9:00. Will end by 3:00 on Wednesday to allow participants the opportunity to travel home that evening.
- Breakfast/lunch/coffee breaks will be provided on both days
- Agenda: will be finalized and distributed in the next few days
 - o Day1: Making applications caBIG compatible
 - Overview and discussion of compatibility document
 - Introduction to model-driven architecture
 - Introduction to UML and object to relational mapping
 - Relationship between UML and CDE
 - How to use EVS

Integrative Cancer Research Workspace

General Q & A	<ul style="list-style-type: none">▪ Harmonization<ul style="list-style-type: none">○ Day2: ICR-specific data representations, standards and data domains<ul style="list-style-type: none">▪ Overview of external data exchange documentation▪ SIG representative led discussions			
	<ul style="list-style-type: none">- Each SIG seems to work on a same set of problems. How will this project avoid duplication of effort? (Steve Enkemann)<ul style="list-style-type: none">○ The goal of ICR this year is to achieve interoperability of applications across centers. It is OK to have some overlaps among SIGs, as multiple efforts are necessary to deal with different types of data. As we go, these efforts most likely will converge into a common ground. (Juli Klemm)○ This issue has been discussed often in the Architecture Working Group. It was agreed that the short-term federated databases, and true grid should be a long-term goal. (David Fenstermacher)- Will there be training/education about the grid architecture?<ul style="list-style-type: none">○ This is somewhat of a “chicken and egg” problem. Pilots are beings designed to more closely examine the technologies that have been identified and to address outstanding issues. For now, it is important to get projects to the point where they are well-described such that they are “ready” for grid implementation. However, some retrofitting is probably inevitable (David Kane).			
Action Items:	Name Responsible	Action Item	Date Due	Notes
	Juli Klemm	Distribute meeting minutes		
	Juli Klemm	Distribute draft Agenda and itinerary for the face-to-face meeting		
	Juli Klemm	Distribute the External Standards document to the Workspace
